

Board of Director's Policy Students 500 Series

Policy # 500.20

Administering Medicines to Students

Students should not take medication during school hours or during school-related activities unless it is necessary for a student's health and well-being. When a student's licensed health care provider and parent/guardian believe that it is necessary for the student to take a medication during school hours or school-related activities, the parent/guardian must request that the school dispense the medication to the child and otherwise follow the School's procedures on dispensing medication.

No School employee shall administer to any student, or supervise a student's self-administration of, any prescription or non-prescription medication until a completed and signed "School Medication Authorization Form" is submitted by the student's parent/guardian. No student shall possess or consume any prescription or non-prescription medication on school grounds or at a school-related function other than as provided for in this policy and its implementing procedures.

Nothing in this policy shall prohibit any school employee from providing emergency assistance to students, including administering medication.

The Executive Director or designee shall include this policy in the Parent-Student Handbook and shall provide a copy to the parents/guardians of students.

Self-Administration of Medication

A student may possess an epinephrine auto-injector (EpiPen®) and/or medication prescribed for asthma for immediate use at the student's discretion, provided the student's parent/guardian has completed and signed a "School Medication Authorization Form." The School shall incur no liability, except for willful and wanton conduct, as a result of any injury arising from a student's self-administration of medication or epinephrine auto-injector or the storage of any medication by school personnel. A student's parent/guardian must indemnify and hold harmless the School and its employees and agents, against any claims, except a claim based on willful and wanton conduct, arising out of a student's self-administration of an epinephrine auto-injector and/or medication, or the storage of any medication by school personnel.

School Supply of Epinephrine Auto-Injectors

The Executive Director or designee shall implement Section 22-30(f) of the School Code and maintain a supply of epinephrine auto-injectors in the name of the School and provide or administer them as necessary according to State law. This section of the policy is void whenever the Executive Director or designee is, for whatever reason, unable to: (1) obtain for the School a prescription for school epinephrine auto-injectors and a standing protocol from a physician licensed to practice medicine in all its branches, or (2) fill the School's prescription for school epinephrine auto-injectors.

Upon implementation of this subsection and Section 22-30(f) of the School Code, the protections from liability and hold harmless provisions as explained in Section 22-30(c) of the School Code apply.

No one, including without limitation parents/guardians of students, should rely on the School for the availability of an epinephrine auto-injector. This policy does not guarantee the availability of an epinephrine auto-injector; students and their parents/guardians should consult their own physician regarding this medication.
