

Week of 12/10

Words of the Week
decimal, trait, coast,
you're, adapt

Important Dates:

12/14: Pizza Friday

12/19: Band concert
7pm

12/21: Winter Sing
8:30am

Reading

This week students are practicing main idea and detail. We are also focusing on textual evidence. Students will continue their work in small groups and read to self and someone.

Writing

Students did an incredible job sharing their fairy tales last week. This week we are working on using commas correctly and working on organization, note taking, and research as students draft their informative papers.

S/SS

We are continuing reading about the plains and woodland Indians. Students are also learning about inherited traits in science. We will be examining the adaptations of different animals in various ecosystems and climates.

MATH

In math students are learning about the correlation between fractions and decimals. At the end of the week they were introduced to place value with decimals and how a fraction can be expressed in decimal form. They will be exploring relationships with fractions and decimals through ordering on a number line and practicing decimals in a variety of story problems.
