

Week of 1/28

W.O.W
kilometers, weathering,
through, their,
there

Important Dates:

1/30-2/1: Benkadi days
assemblies

2/4: Kids Heart Challenge
Assembly

2/6: Early Release

Reading:

We have been working hard to complete our winter reading testing. We plan to continue with reading groups later this week. We are also working with cause and effect and sequencing. Ask your student what we read about Nelson Mandela!

Writing:

This week students are continuing the writing process of their persuasive papers. They are in the process of researching for support and developing counterarguments.

Science

This week we are studying soil, rocks, and landforms. We will be doing many experiments and Ms. Naomi will be doing a fossil lesson with us this week as well!

MATH

We have been working on subtracting in the thousands-hundred thousands using a variety of strategies, including the standard algorithm. They were also introduced to kilograms and conversions. This week students are exploring grams, kilograms, ounces, and pounds as they help plan our scenarios in word problems as a class. Students are also converting units within the same system and creating ratio tables to solve problems independently.
