

Week of 10/8

W.O.W Words
cycle, nectar, area, knew,
covered
(test 10/12)

Important Dates:

10/8 NO SCHOOL
10/10 Picture Retakes
10/14 Fall festival
10/17 Early release

*Be on the lookout for a
newsletter email Friday
about upcoming soup day

ELA

We are getting into our Greek Mythology unit! We will be working on adjectives, making inferences, character traits, comparing and contrasting, and annotating.

writing

We are finishing up paragraph structure and students are starting the drafting process of their personal narratives.

S/SS

As our wetland, prairie, and woodland unit comes to a close, we are completing our murals and sharing our findings about the different habitats and organisms within. We will be moving on to IL history!

MATH

We are continuing to build multiplication and division skills. If you would like to work with your child at home, flashcards are a great tool to get their facts up to speed to assist them in the other aspects of math coming up. We are continuing our work with base ten and building arrays. This week we are also getting into multiplying single digits by multiples of ten. We thank you for all your support at home!
