

10/28

Words of the Week

an, where, wear

Important Dates:

10/30:
Farm to Table

10/31:
Halloween Parade: 1:45
Party: 2:15-3:15

11/4:
Chipotle Night Fundraiser 4-8

Reading:

Students are loving The Chocolate Touch and learning to make meaningful connections. Text to self, text to world, and text to text. In whole group lessons, we are also working on perspective and point of view.

Writing:

This week students are learning when to use “an” vs “a” in their writing. We are also practicing with descriptive sentences and including relevant details. We wrap up our small moment stories this week and begin the next unit of opinion essays!

Sci/SS:

Students have been experiencing different properties of light and how light travels. This week we continue to complete a variety of experiments that bring us to the conclusion that light=energy.

MATH

This week we are continuing to build our multiplication strategies and students will be taking part in surveys to find out which ice cream flavors each student likes best. The data then will be organized, and students will work in pairs to represent the survey results on a picture graph. Students are introduced to graphing as each student transfers the information to a bar graph. Students then compare the two types of graphs and observe the advantages of each. Our unit two test is approaching as well. Please keep an eye on your child’s assignment notebook. They may be assigned specific standards to practice at home on IXL.
