- \* Tues. 11/19 Farm To Table
- \* Mon. 11/26 Early Release-Conferences
- \* Tues. 11/26 Early Release-Conferences
- \* Wed. 11/27- Fri. 11/29 No School
- \*

## **Our Learning**

**4th Grade Math:** Students continue to study the relationship between fractions and decimals. Students are learning how to convert decimals into fraction form and vice versa. Students are working hard in Math and are 2 tallies away from a classroom math reward. I continue to encourage students to work on IXL "recommendations" when they are able to at home.

**Reading:** Students are working together in small groups on reading comprehension strategies. Together, we continue to read small passages and answer questions that lead to student reflection and meaningful conversations.

**Science/Social Studies:** We continue to learn about sound and how it works. Students participated in both outdoor and indoor experiments related to animal and human sounds.

**Writing:** Students completed their rough drafts and peer editing for their informational papers. Final Drafts will be completed in class next week. Students also continue to learn cursive in their handwriting books.
