Soup Day Update :)

- * Students will enjoy the Bean soup they made from scratch Monday afternoon. Our delicious soup is safe in a refrigerator and will be reheated Monday morning.

Odds and Ends

- * Winter seems to have arrived early this year. Please make sure students have warm boots, hats, gloves, and jackets for outdoor recess and academics.

Future Dates

- * 11/11 Veterans Day Assembly 8:15am
- * 11/13 Early Release 1:00pm
- * 11/14 [MPAC](#) Mawlid & Literacy Night
- * 11/15 Conference Sign ups will be send via email at 4:00pm

Our Learning

4th Grade Math: Students were introduced to decimals this week in addition to our fraction studies. We will continue to study the relationship between tenths and hundredths in relationship to fractions and discover that tenths may be rewritten into hundredths. We will model fraction and decimal amounts using base ten area pieces, arrays, and drawings.

Reading: Students are working together in small groups on reading comprehension strategies. Together, we read informational passages and then students are asked to answer questions directly related to the text.

Science/Social Studies: We are learning about sound and comparing/contrasting the types of waves created by both light and sound energy.

Writing: Students are writing informational papers about a chosen topic using research notes from reputable sources on the chromebooks. Students did a great job taking notes about their chosen topics.
