- * Winter Party 11:45-12:45
- * Early Release 1pm
- * Winter Break 12/23-1/3
- * School Resumes Mon. Jan. 6th

Our Learning

4th Grade Math: Students continue to learn about the standard algorithm and compare this method to removal and differencing number lines. Students may practice their skills using IXL at home at your discretion. This supplementary program is personalized for each student and progresses as they increase their skillset.

Reading: In addition to our Daily 5 strategies, we continue to read short passages in class and recall information from the texts through guided reference questions.

Writing: Students are working on typing their opinion papers in class. We've completed our rough drafts and worked on self-editing. Our next step will be to complete our final drafts on google classroom and complete a self-assessment questionnaire.

Science/Social Studies: We continue to study electricity. We will complete this unit of study on Thursday and begin the study of magnets after winter break.
