Friday News

10-14-22

3rd Grade Math

This week's session began with a count-around in which students count by 3s, 6s, and then 9s to 90, making predictions and observations as they go. Then, students completed a checkpoint to gauge their understanding of some of the skills and concepts presented in the unit thus far. The checkpoint came home today. Students worked in pairs to build a measuring strip made of cubes as well as matching paper strips for multiples from 2 through 10. Then the class looked at their number lines together to discover relationships between multiples.

Reading

Word Study for 3rd graders consisted of gameplay this week breaking words into syllables to decode manageable units. Word Study for 4th graders was recognizing and categorizing vowel sounds with "r." We read an autobiography this week; A Boy and A Jaguar. The children responded to the book in writing. They wrote about the adults in the author's life and the effect they had on his life. Lastly, we read two Greek myths and discussed the feelings, actions, speech, and thoughts of Zeus and King Midas.

Writing

Students were tasked to find the heart of their stories this week. The heart is the most important part because it gives life to the rest of the story.

Science and Environmental Education

The students enjoyed time with the book buddies this week and participated in the GREEN challenge of destressing in nature. We made buckets of bubble solution and assembled large wands made of string and headed out to the gazebo for fun and frolic with our buddies!

Students completed their first training of “Ecological Understandings” this week and will receive their first water bottle sticker once we complete one last journal entry! Great job ECOHeroes!

To become an ECOHero, we will need to undergo training in four areas:

- **Ecological Understandings**, to ensure that you have knowledge of how nature truly works
- **Connection to Nature**, to ensure that you love and care about the earth and its inhabitants
- **Outreach to Others**, to ensure that you are teaching others about the importance of keeping earth’s systems in good working order
- **Habits that Help**, to ensure that you are leaving an earth-friendly lifestyle.

Upcoming Events

10/16/2022 - PSO Harvest Fest

10/17/2022 Roasting Potatoes-bring a fork and small bowl

10/21/2022 - October Natural Leader Assembly
